

May 14, 1979

Mr. Edward J. Patterson
Photocircuits Corp.
West Lane
Aquebogue, NY 11931

Dear Mr. Patterson:

As we discussed during our telephone conversation 5/11/79, a letter is required from the Glen Cove Dept. of Public Works authorizing the processes and subsequent sewer discharges indicated on Photocircuits' March 22, 1979 application for an industrial waste hauler registration.

The letter should include a description of these processes as recorded on the March 22 application and annual report and be signed by someone of authority within that agency.

In addition, this letter hereby withdraws the request made in my May 2 letter to you that an analysis of the discharge from these processes be submitted to this Department.

If a sludge is generated during these reclamation processes or at the pretreatment plant, information regarding the constituents, quantity, and method of disposal of the sludge is required by this office, however.

If you have any further questions, please contact me at 518-457-3254.

Sincerely,

Daniel M. Quackenbush
Chemical Engineer
Bureau of Hazardous Waste
